

Sustainable Procurement Policy

MMG Polymer Co., Ltd. believes in the importance of doing business with suppliers who actively work to reduce the negative environmental and social impacts of their operations.

Our policy applies to MMG Polymer Co., Ltd., its subsidiaries, affiliates and all legal entities, including all executives, employees, contractors suppliers and business partners.

We are committed to procurement raw materials products and service from suppliers and contractors who can demonstrate compliance with environmental and social best practices. We are committed to creating a more sustainable supply chain by setting relevant and impactful targets.

We have an objective to require all suppliers and contractors we work with to proceed a new vendor/supplier evaluation on environmental issues, and an annual supplier sustainability assessment on environmental issues.

The Procurement Department is responsible for drafting the policy, presenting annual objectives to the Board of Directors, and developing initiatives and tools to improve the Company's performance. It also identifies leading practices and tools the Company can use to help achieve its commitments and goals.
